Explanation of the future

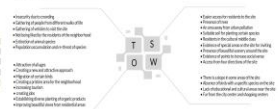

Park Science - Sensory Planting (on the horizon of 1403) is an agricultural garden, located in Behran, in the western part of district 22, with an area of approximately 7 hectares, which makes for better and more communication among the people of the region, improving nutrition, a place for residents to relax. A place for education and communication with nature and reviving the ecology of the region has been designed.

Site analysis

Due to its location in the westernmost part of Tehran and its proximity to the southern foothills of the Alborz mountain range, District 22 of Tehran benefits from a cooler and more pleasant climate compared to other areas of Tehran.

SWOT

Plan guide

- | | |
|---|---------------------------------|
