ABOUT THE PROJECT

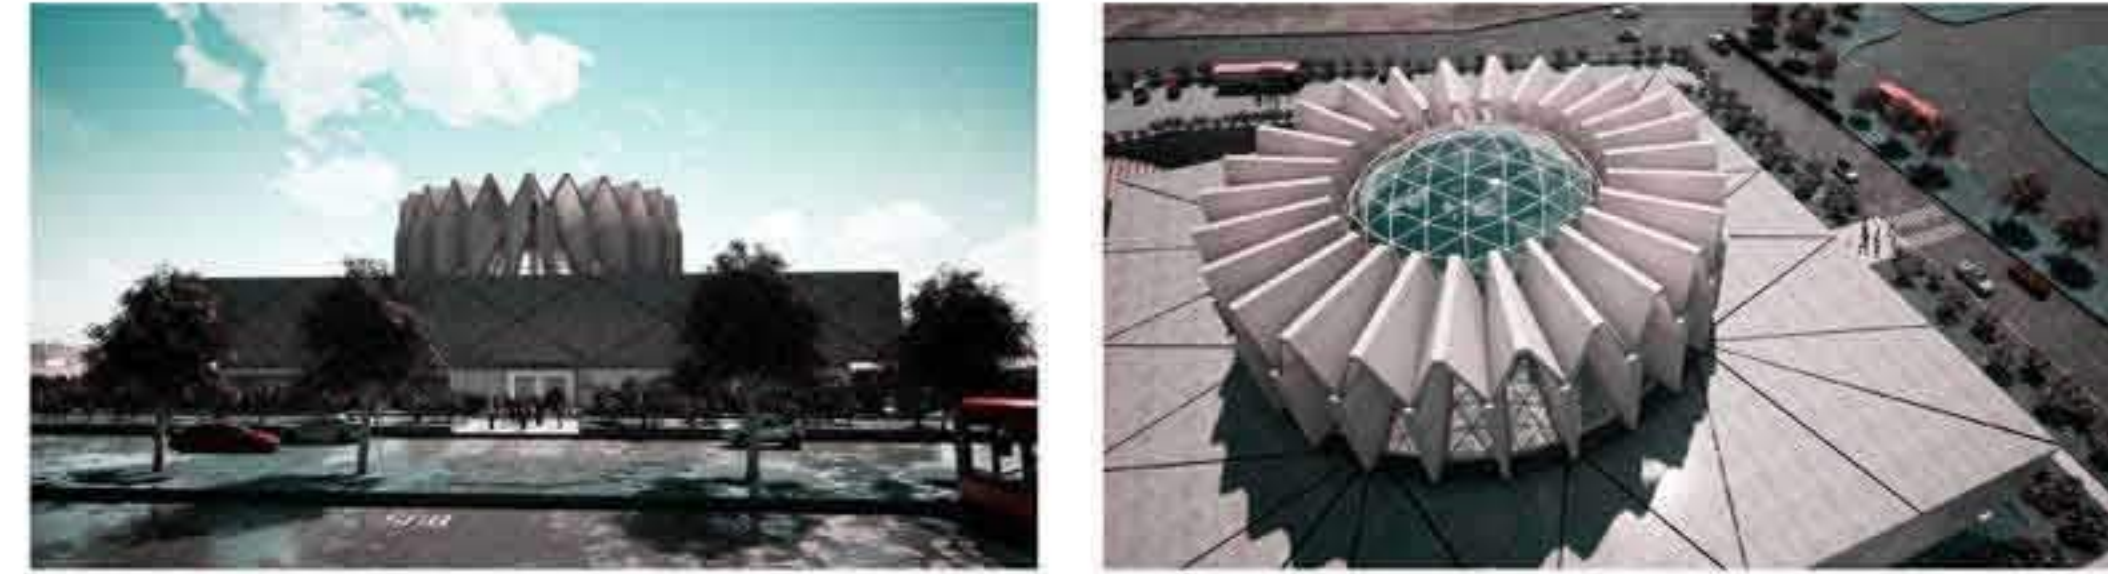

Toos is one of the most famous and historical cities of Khorasan Razavi province. The name of the city, Toos, reminds Ferdowsi more than others. It is located 35 kilometers northwest of Mashhad. The origin of the Toos can be found in the plain of Kashfrud, which is included in the province of Toos with several large cities and many villages of valleys. Size of the city is about 16500 km. The historic history of Toos dates back to the ancient period (2nd century AH). Some history of the city and its construction have been attributed to Jamshid Pishdadi. In Avesta, Toos has come to the name "Oru" and it is one of the sixteen holy lands in Vendidad. It is also said that history of Toos is related to Persian hero of Shahnameh, and introduce his name with the city.

The Avesta and Shahnameh have been spoken about Toos. In none of the pre-Sasanian sources, Toos has not been seen, and all the cities of the northeast of the country have been listed as a state during this period. The name of the Toos can be seen among the resources of the Sasanian era. In Shahnameh, "Sam" has fought and dragged Drago near Kashfrud in the city of Toos.

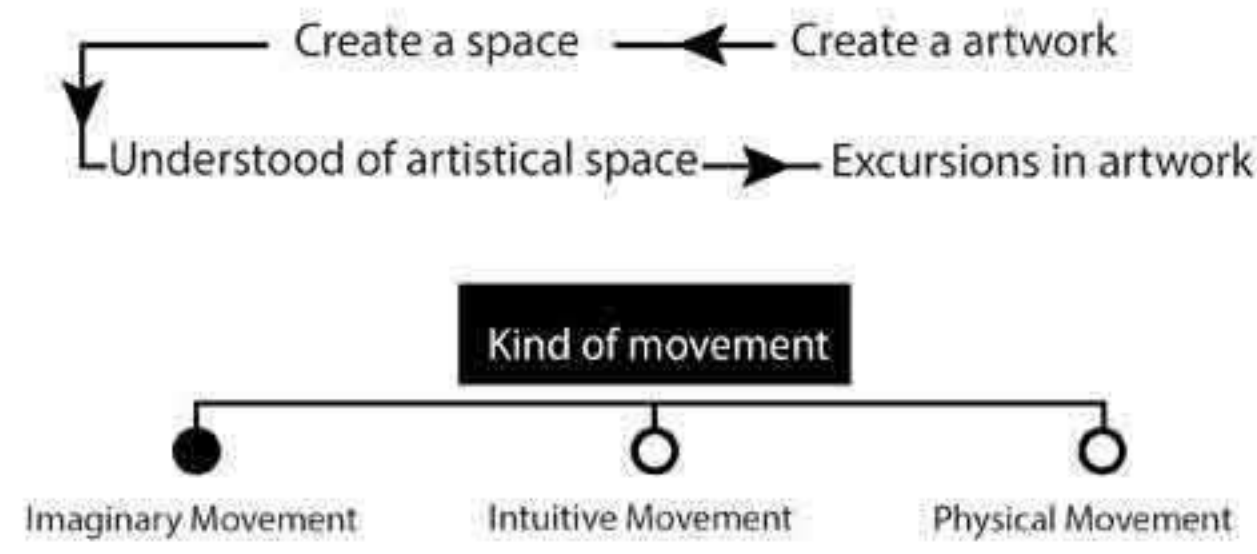

O.zFerdowsi reports the assassination of Sassanid Yazddard in this city. Most people in the city are Muslims with a Shiite religion. Other points of interest near the city include the "Dome of Haronye" and "Pag Town".

Due to importance of the context site and its location, in terms of its proximity to Koohsangi Park and being adjacent to Koohsangi Street, which are both antiquated, the project has been influenced by green space of Koohsangi Street. The designing process was done in a way to make the area of the project a flexible place for both residents and visitors.

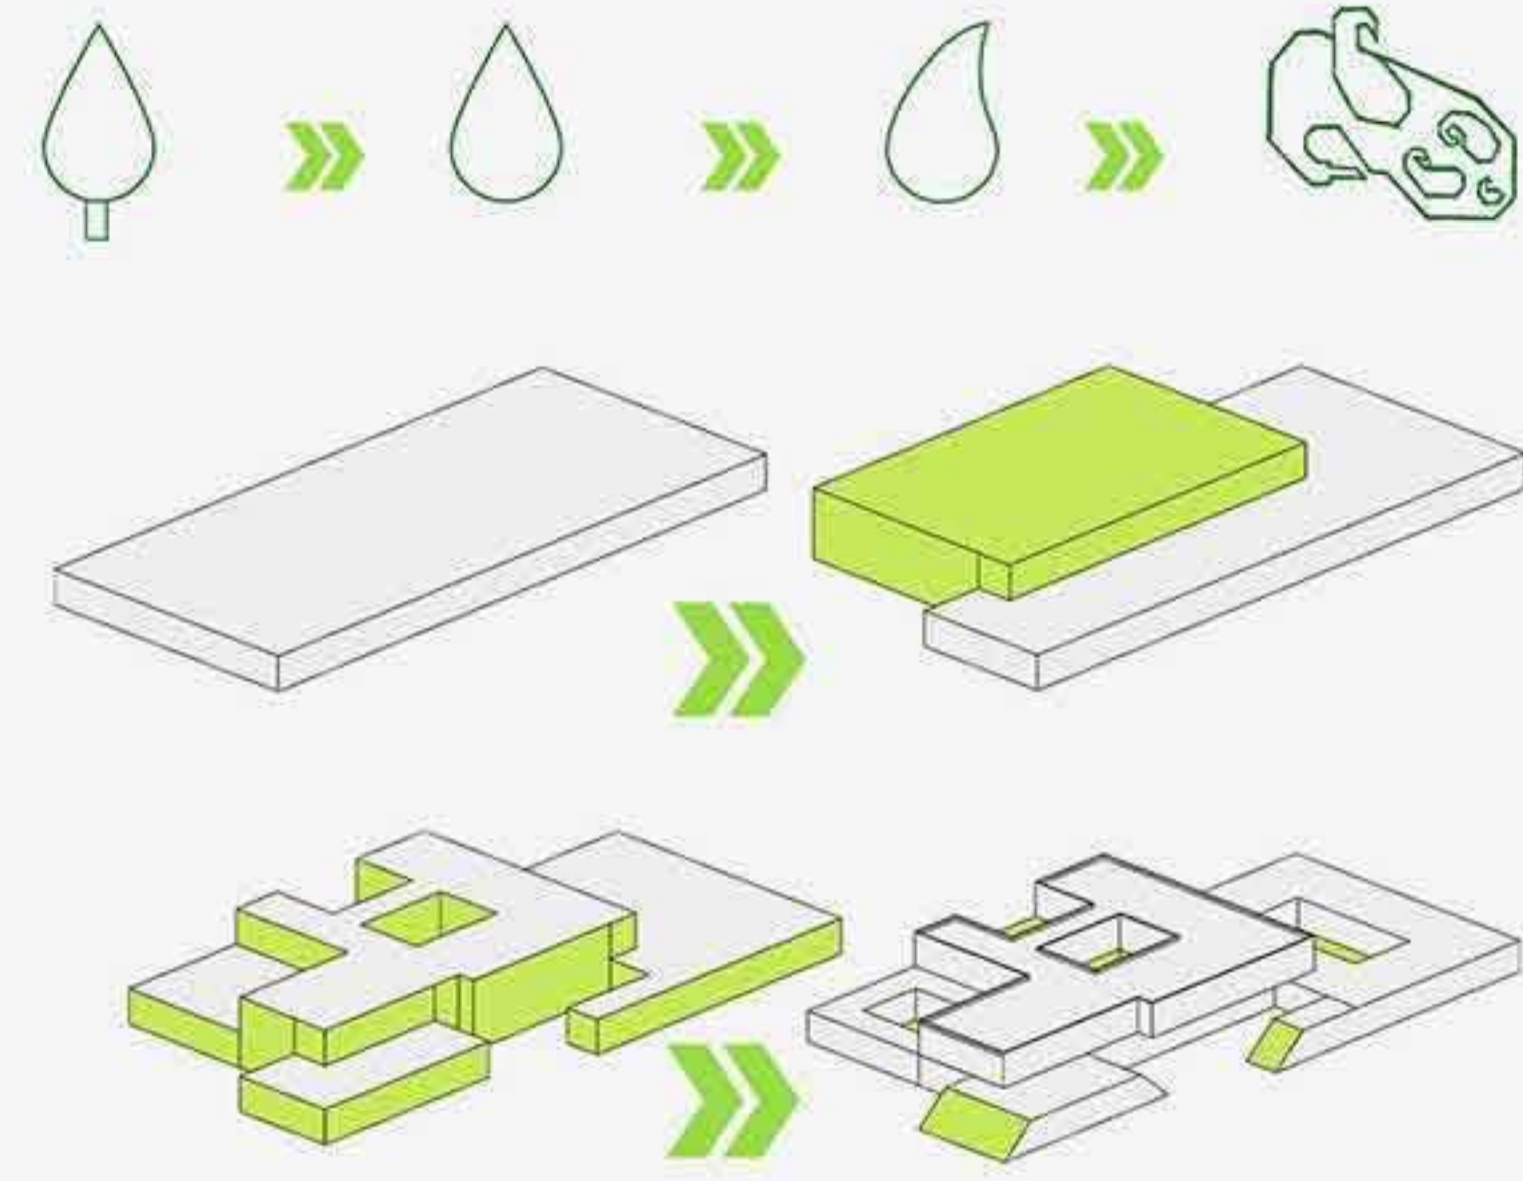

IDEOGRAM

The idea of designing this project is a cypress tree because in Iranian culture, the most beautiful, valuable and conceptual tree is the cypress tree, and in Iran, the cypress tree is more prominent in myth and art. The word cypress means symmetrical. (Due to the type of arrangement of the stems - after Islam entered the gilding Concepts of cypress tree: endurance and stability, freedom, ascension, .eternal courtyard, paradise

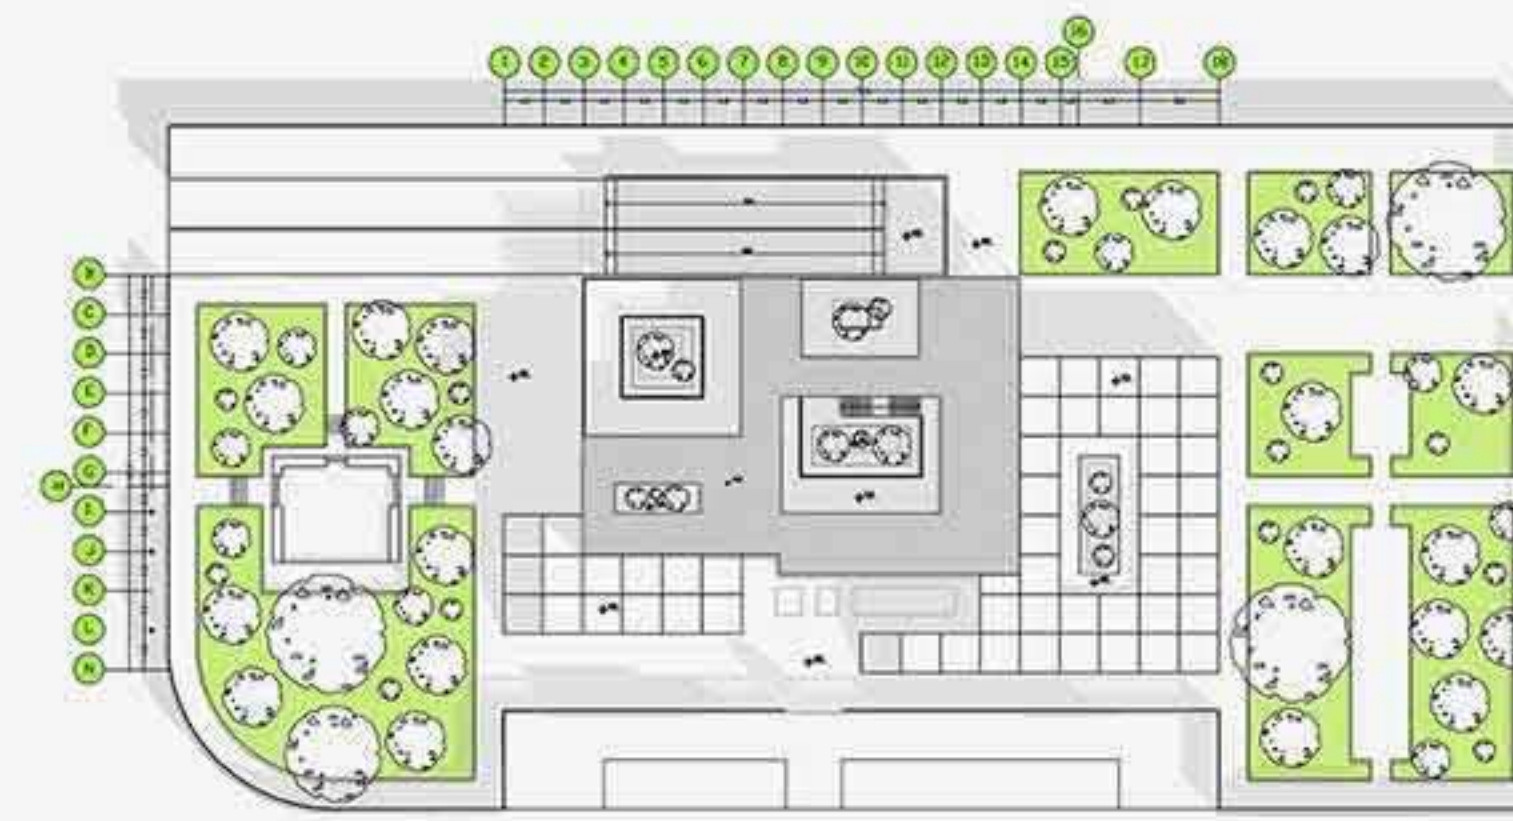

CONCEPT

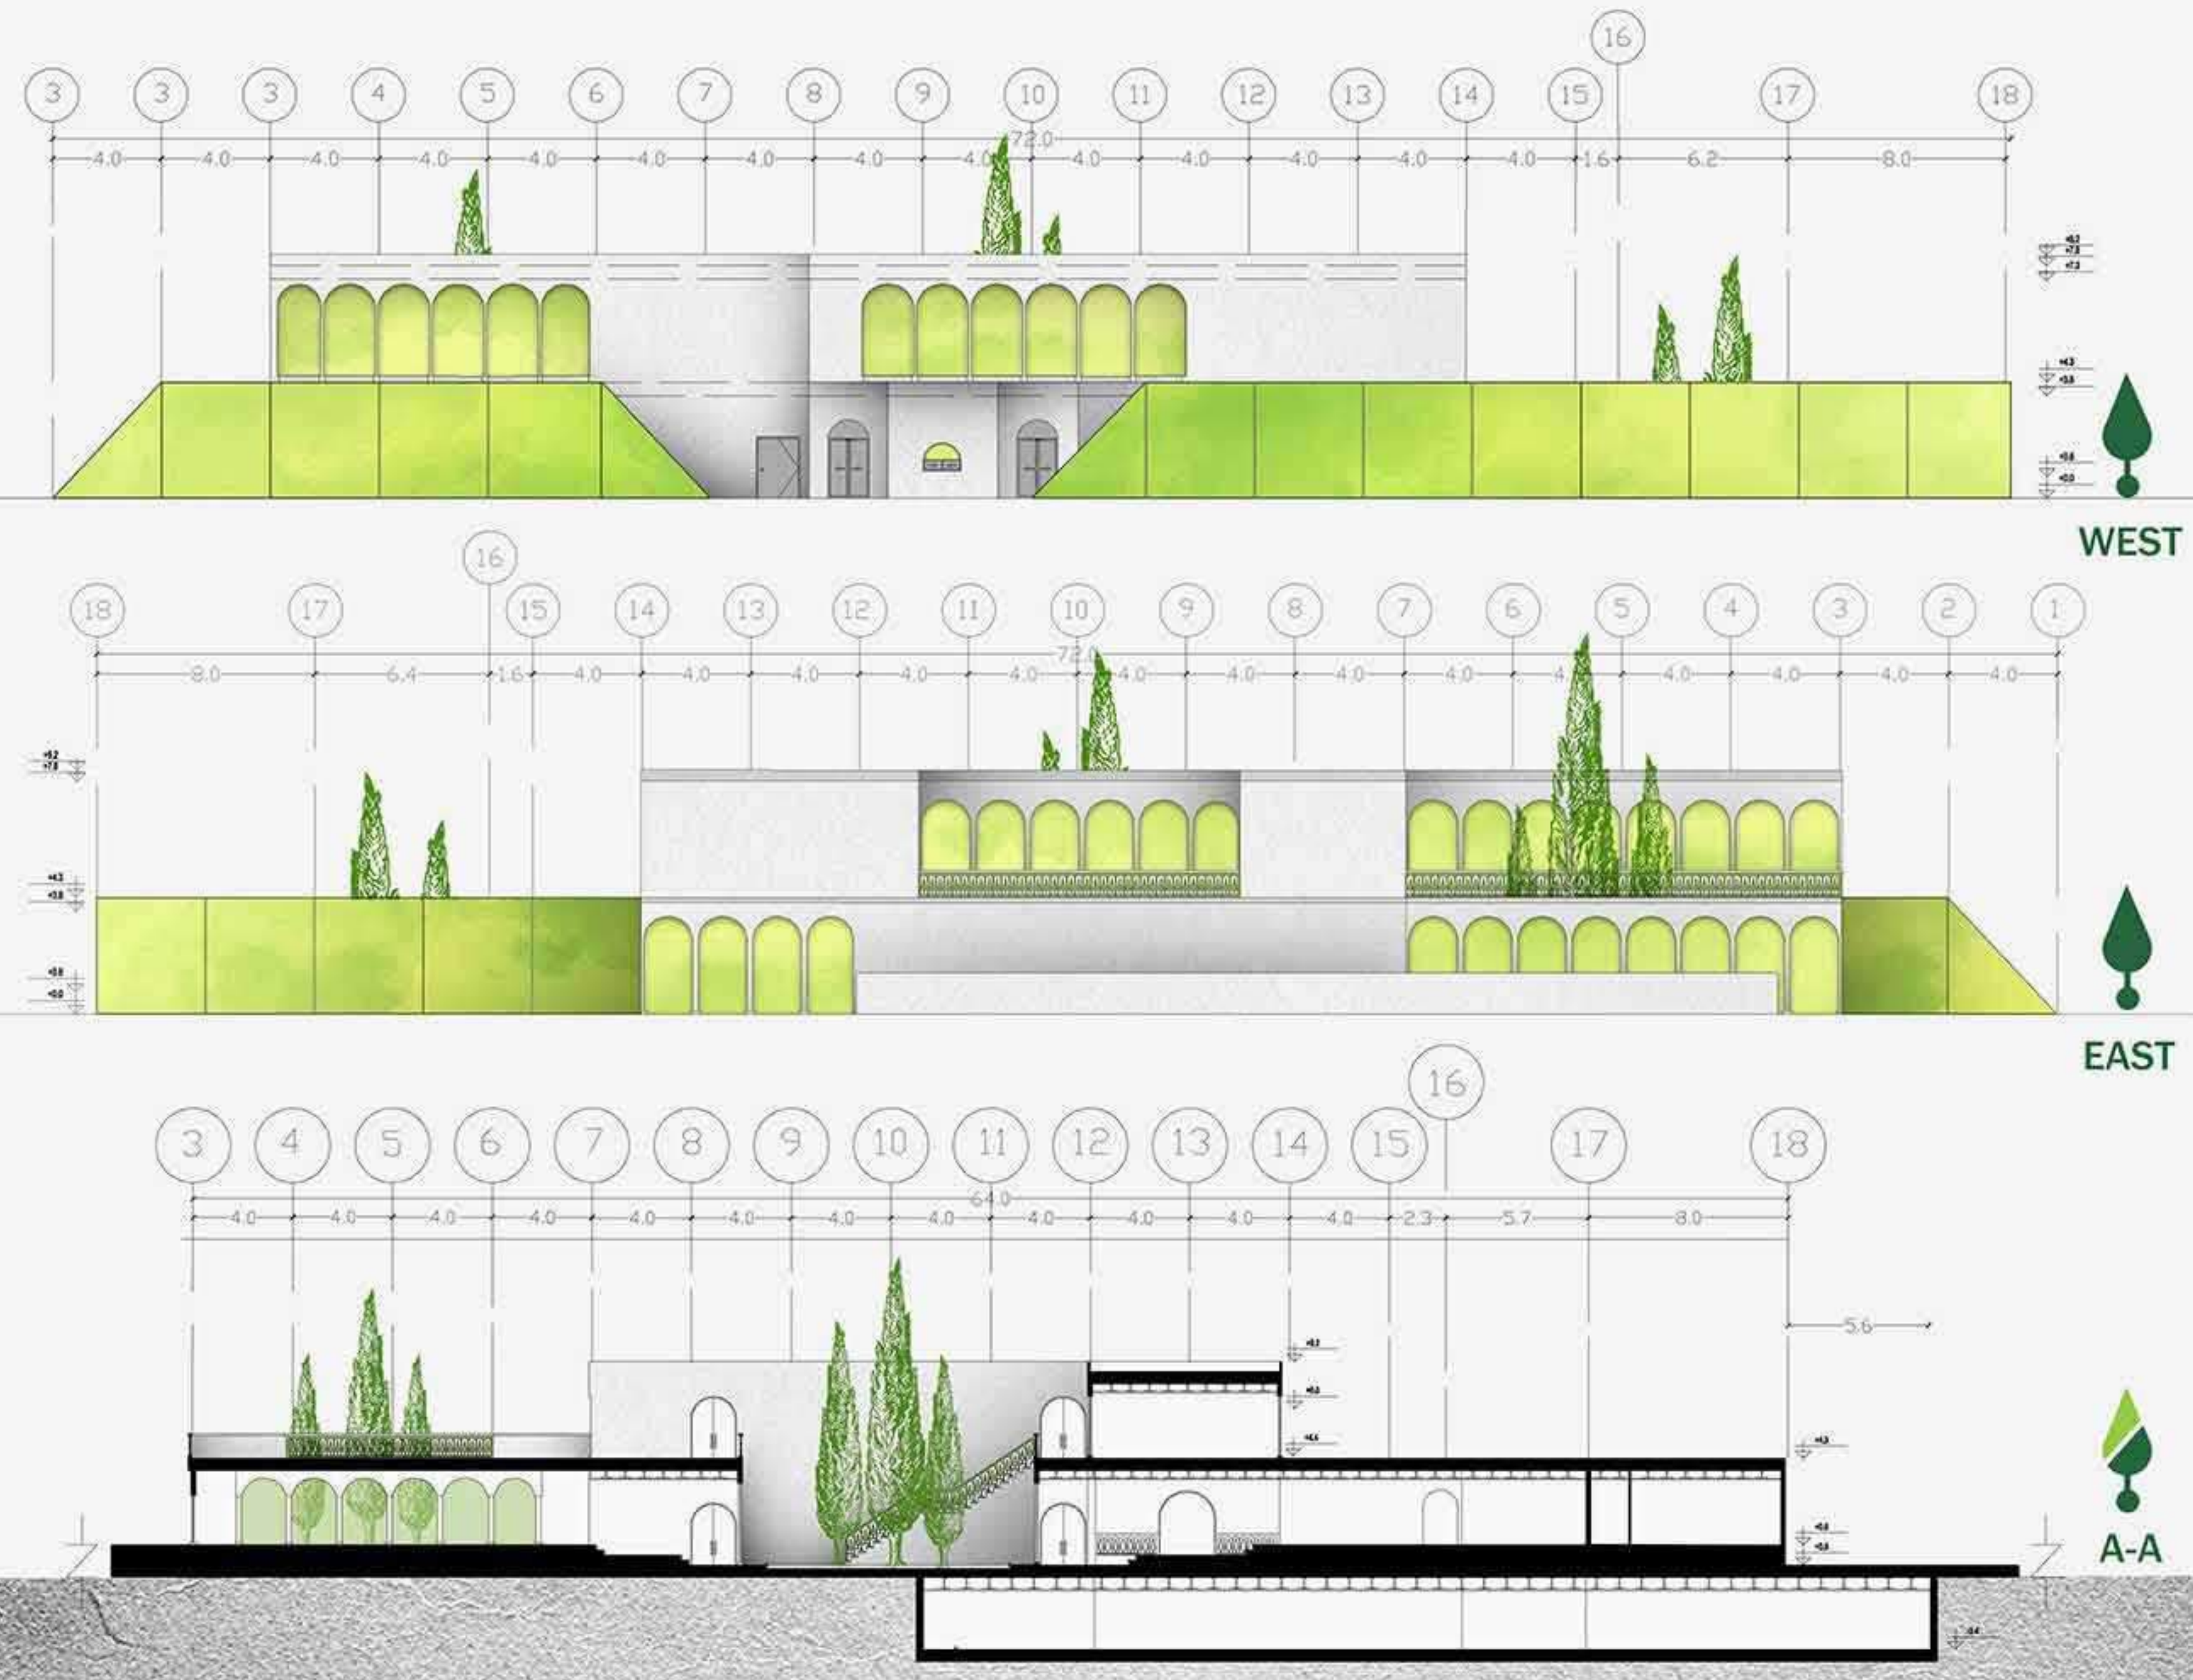

The cypress tree symbol was used as a tear during the Sassanid period and was a symbol for the Mazdakian group known as the Justice Sect and their efforts to establish equality and public justice, which resulted in the beheading of all its members during Ghobad's rule. But this concept remained immortal in the hearts of the people and after them the head of the cypress symbol was bent downwards as sorrow and grief
