CITRONAL®

8070 NEW Wonderful 220C

CITRONAL®

Citronal professional hair dryers are designed to meet all your styling needs from traditional straightening to the latest styling demand. The outer housing features special low power air turbine in diamonds and is smooth as granite for an efficient and perfectly fine ionizing effect, maintains and prevents the hair to oxidize, making the styling easier, soft and healthy.

High quality of material and advanced technology are the main characteristics of the product. A complete range of Citronal hair dryer meet the hair from being damaged during the drying action. In fact, Turbo function will increase the movement of air particles and consequently, warm them.

Turbo function will cause to produce a very heavy airflow which the heat of heavy air flow seems to prevent drying of the hair in a dried mood, but vice versa, the kind of carbon produced in this device based on a powerful motor would be enough to dry and protect hair which has been damaged during the drying action. In fact, Turbo function will increase the movement of air particles and consequently, warm them.

HIGH NANO TECHNOLOGY

YEAR
GUARANTEE

SEFB & IMMUNE

All the used materials in the product including color film, plastic, metal and networks, when the hair and covers are washed and cleaned with hot and cold water, they are resistant to rust and also on easy usage by the consumer.

8070 NEW Wonderful

High speed performance
Turbo function has enhanced the performance of the motor multi-air and also made the usage of the hair dryer faster and fine drying.
Fast and fast drying
Turbo function will accelerate the hydroporation of water atoms during the wet hair with evaporation and moisture, which leads to a short period of time to get dried.
Reduce the washing time
Along with acceleration of drying function of the hair, the estimated time for all dried hair that would increase to reduce the time of another evaporation is not getting tired of keeping the device in your hand for a long time.
Smooth and will heavy outflow
Turbo function will cause to produce a very heavy airflow which the heat of heavy air flow seems to prevent drying of the hair in a dried mood, but vice versa, the kind of carbon produced in this device based on a powerful motor would be enough to dry and protect hair which has been damaged during the drying action. In fact, Turbo function will increase the movement of air particles and consequently, warm them.
50% more satisfaction of dried hair dry
According to the mentioned specifications, our experts and engineers estimate that based on the current level of drying with the hair over the consumer will feel 50% more satisfaction with the best power hair dryers other than other hair dryers.

CITRONAL®

High output nano technology **Powerful Fabulous**
8080 NEW SERIES

CITRONAL®

Charged professional hair dryers are designed to meet your styling needs from blow-drying to styling to the finish. The side-heating treatment saves the power as moisture is drawn out and evaporated naturally for an extremely moist finish. The high output nano technology provides the heat treatment you need to protect your hair from damage.

High output nano technology **Powerful Fabulous**
8080 NEW SERIES

Turbo function will cause to produce a very heavy airflow which the heat of dryer or flow seems to power drying of the hair in a global manner. It will cause the heat of the dryer to be distributed on a powerful motor which will be a smooth but strong and wetted hair which will prevent the hair from being damaged during the drying action. It will turbo function will increase the movement of air particles and moisture to warm them.

SAFE & IMMUNE

All the used materials in the product including color film, inside materials and materials, even the frame and covers are labeled and produced with best and most safe materials to make it safe and secure for every usage in the consumer.

High output nano technology **Powerful Fabulous**
8080 NEW SERIES

High speed performance
Turbo function has increased the performance of the motor multi-fold and it causes the output of the hair dryer faster and the airflow to be very fast and strong.

Reduce the drying time
Along with the turbo function of drying function of the hair, the external heat will speed up the hair to dry faster than the regular hair dryer. The turbo function is not getting heat of keeping the device in your hand for a long time.

Smooth and all heavy dryer
Turbo function will cause to produce a very heavy airflow which the heat of dryer or flow seems to power drying of the hair in a global manner. It will cause the heat of the dryer to be distributed on a powerful motor which will be a smooth but strong and wetted hair which will prevent the hair from being damaged during the drying action. It will turbo function will increase the movement of air particles and moisture to warm them.

According to the mentioned specifications, our experts and engineers have tested the product for several hours and found that the product will last for a long time and will be safe for every usage in the consumer.
