2017-2022

# About

parya.banakar@gmail.com

+98-09133660502

I am parya, an architectural engineer and urban designer and this is my most recent works.

I am passionate and hardworking, I will not stop until finding my answers. In my opinion, urban designers should be a bridge between architecture and stakeholders in the modern world. We can design better urban public spaces for the future generation, especially in this era of climate change

## Education

Bachelor of architecture in Architectural engineering  
Art university of Isfahan (AUI), Isfahan, Iran  
September 2012 – February 2017

# House of Music

## Project Info

Academic work

Thesis, Art university of Isfahan, 2017

Duration and site location: 4 months and Isfahan-Iran

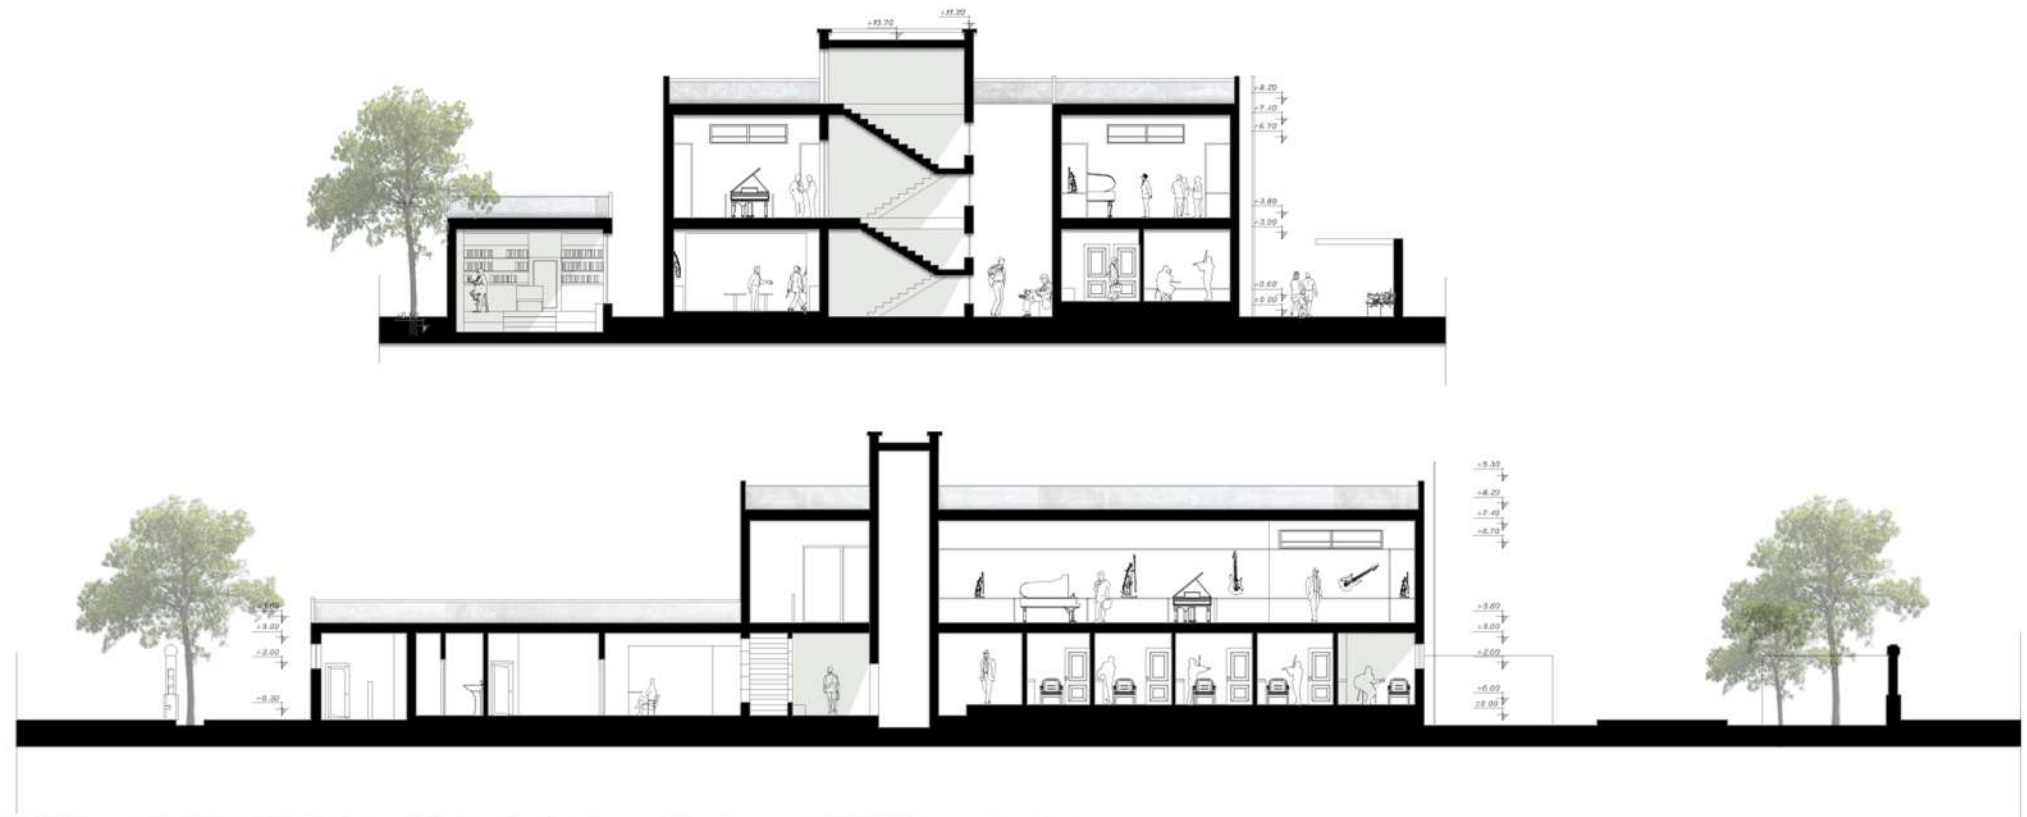

This project aims to design a music museum in an abandoned area.

Paying attention to the materials used and the facade designed are the important elements of this project.

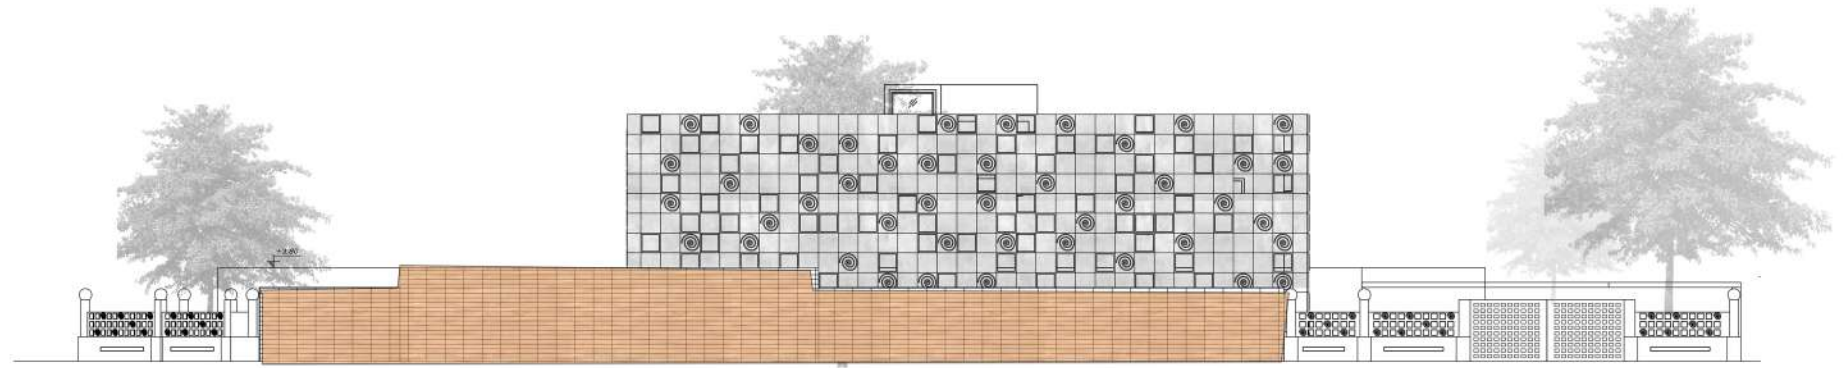

## Section

The stairs are in the middle of the building, which is visible in the sections front.

# Plan-Facade

The facade is made of concrete and the T .key is visible on it  
The plan has a small yard that moves down and is a good place to sit and have a cup of .coffee

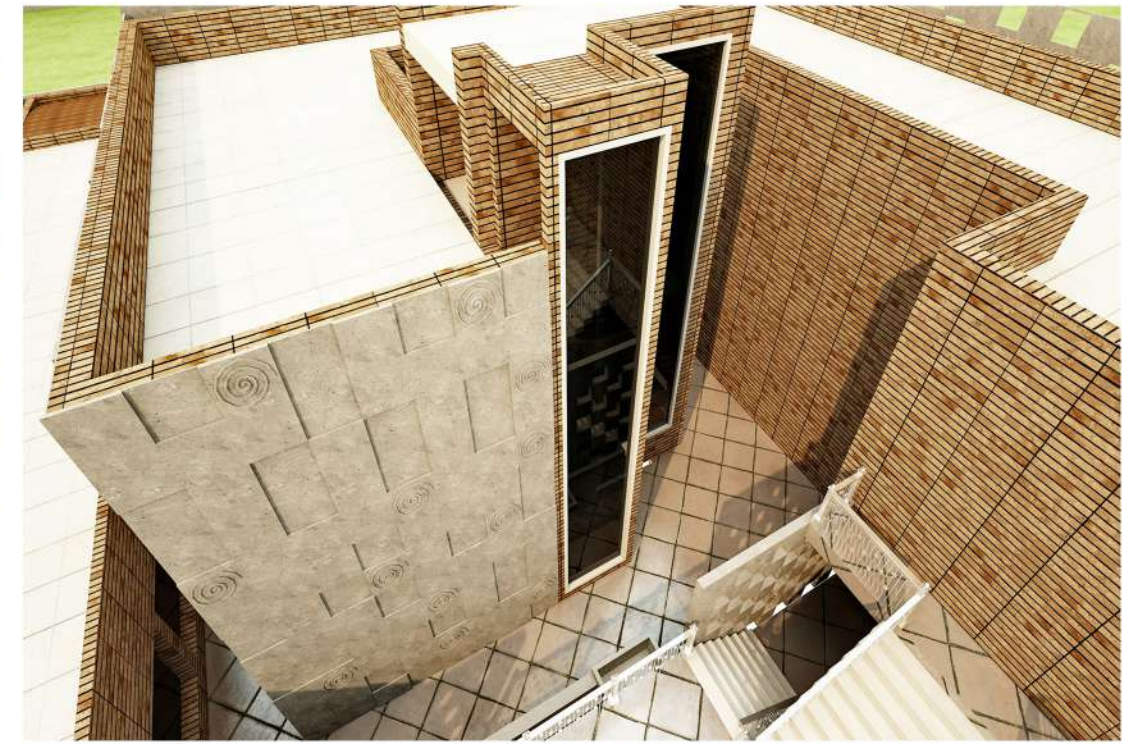

Facade: 1.500

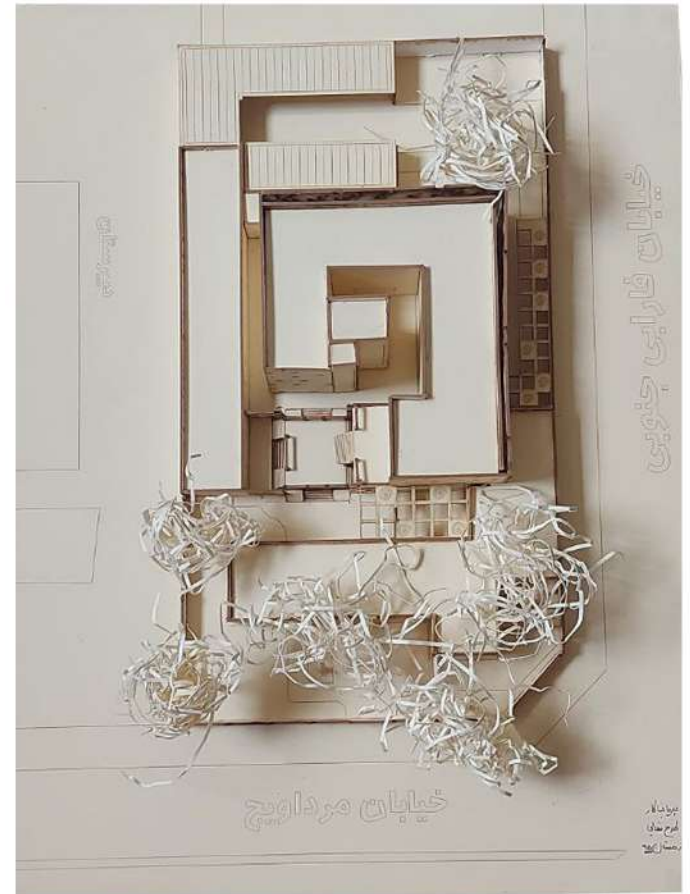

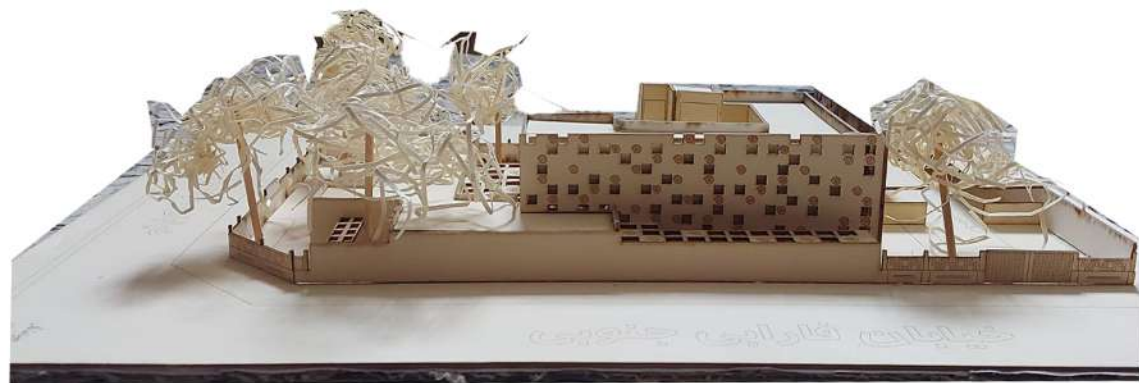

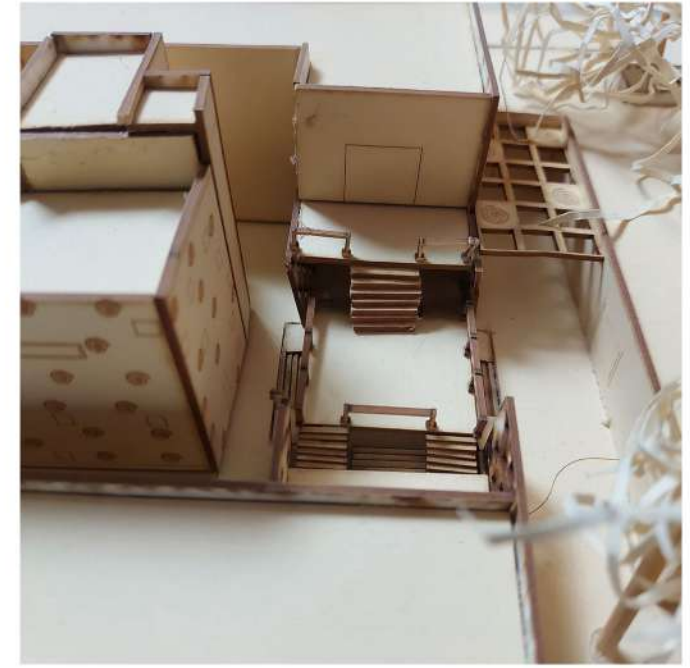

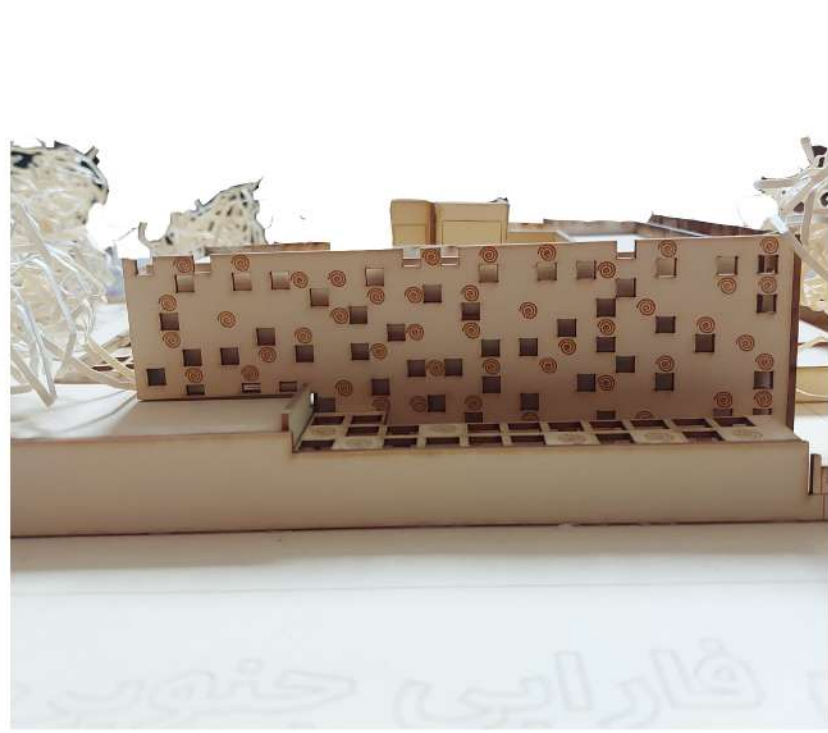

sc: 1.500

## 2 The neighborhood center design

### Project Info

Academic work

Urban design workshop III, Tarbiat Modares university

Year: 2019

Duration and site location: 4 months and  
Tehran-Parand

This project aims to design a neighborhood. After investigating the best routes for cars and people, the house types and the neighborhood center had been designed. Livability and vitality were among the features that were considered while designing.

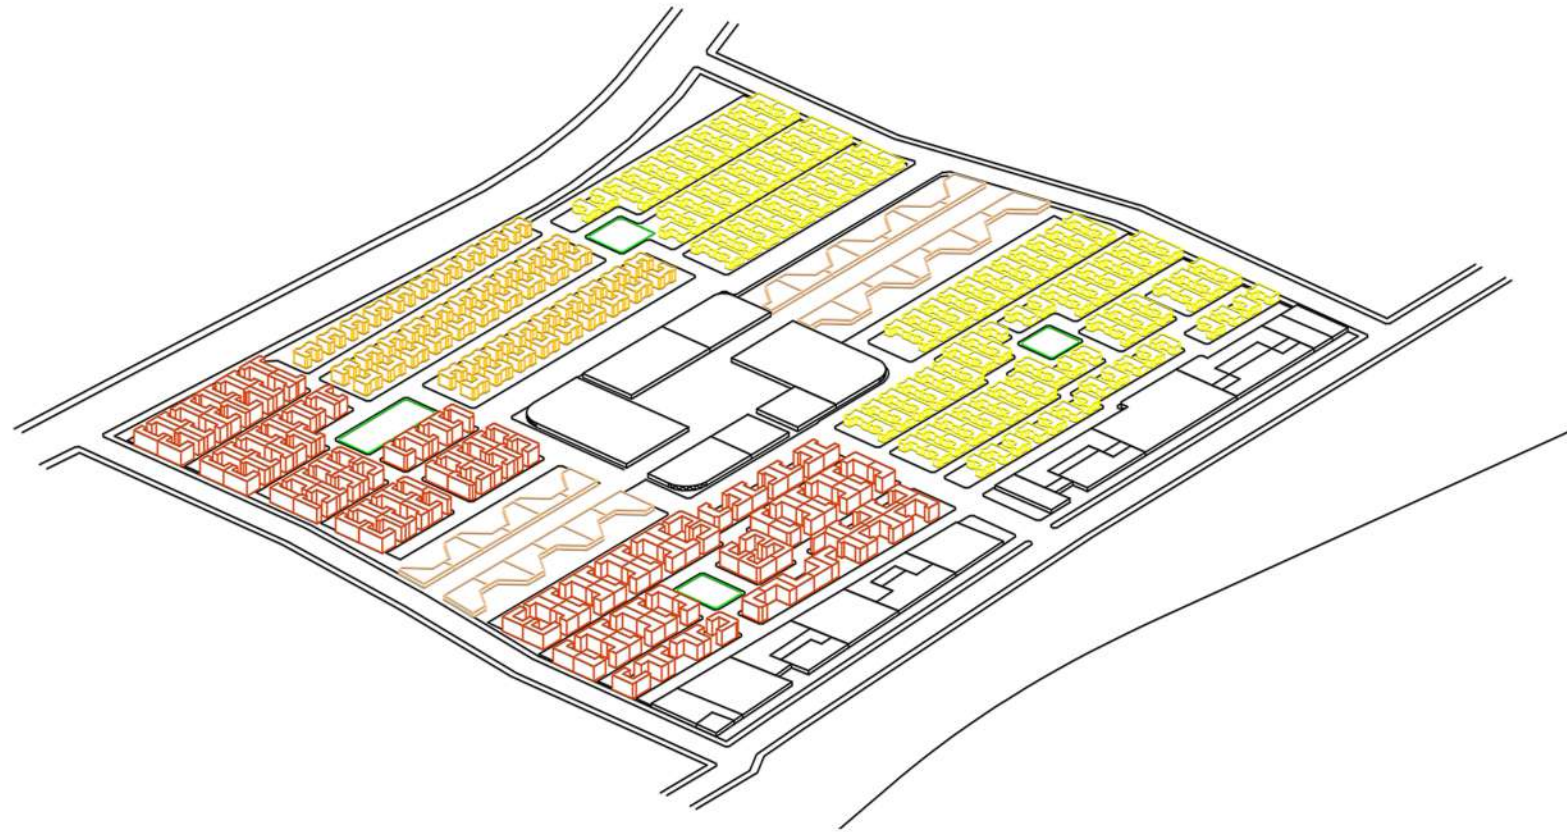

People's comfort in different seasons was provided by tree shadows.

The center zone was defined by putting distinct shade in a different part of the center

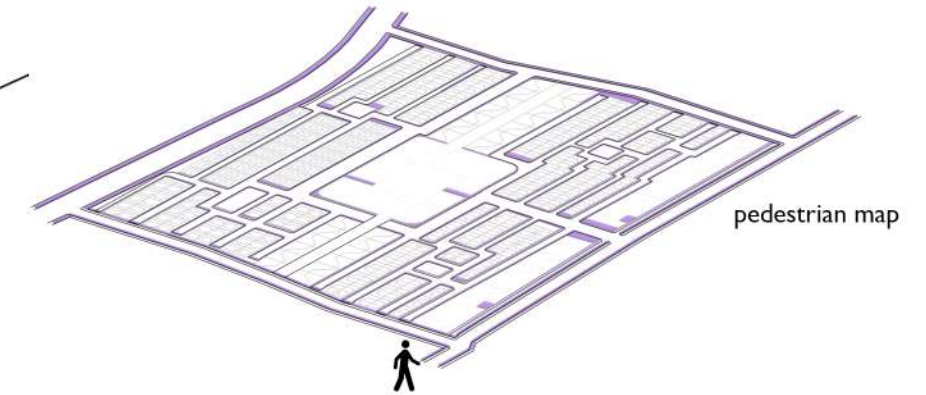

Plan

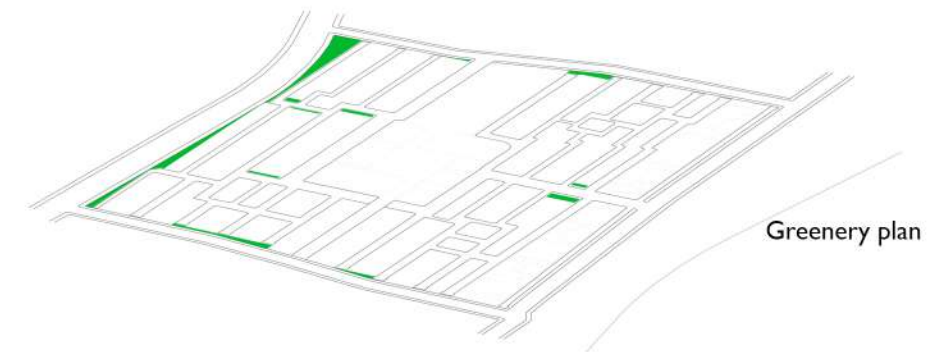

# Detailed P Lan

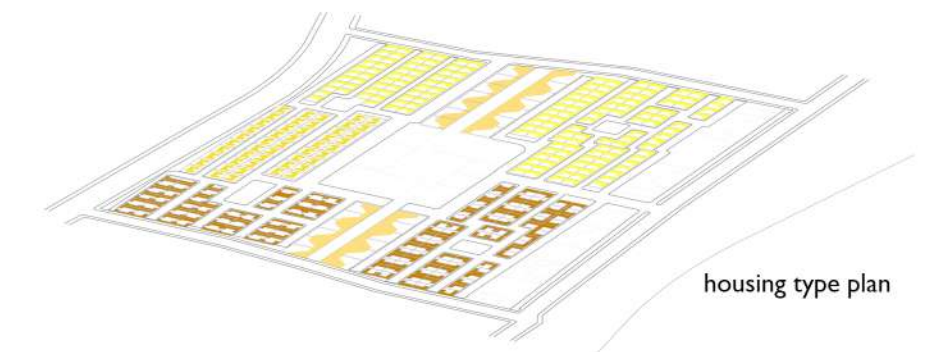

route map

pedestrian map

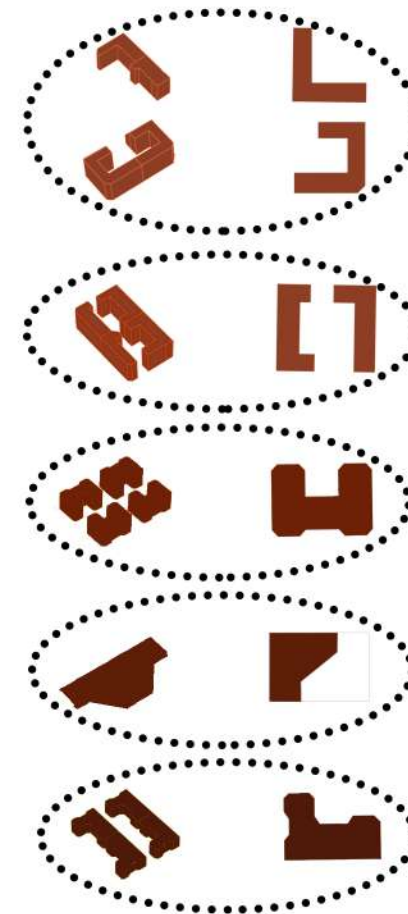

Greenery plan

housing type plan

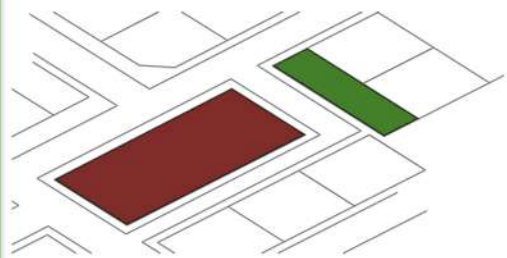

Type of housing

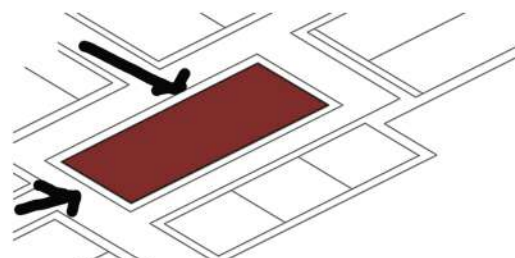

The region is in the north-west of Tehran-Iran. this is a residential area to be. The residential houses have the most amount of south sunlight due to their orientation.

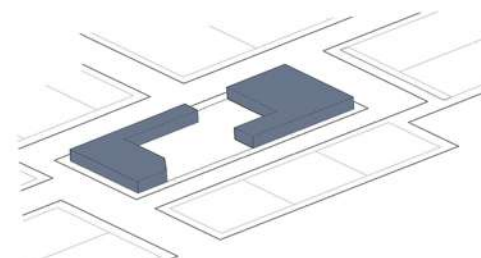

# Design Process

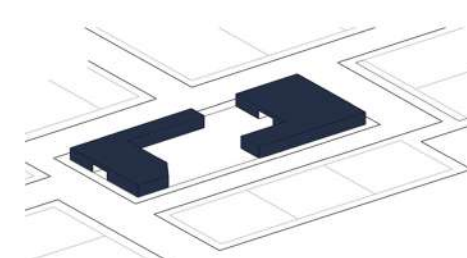

Consolidation of green space with the neighborhood center, make the greenery practical

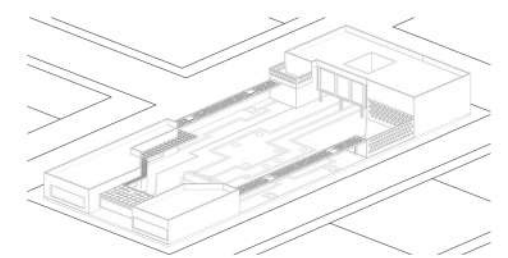

Definig entrance

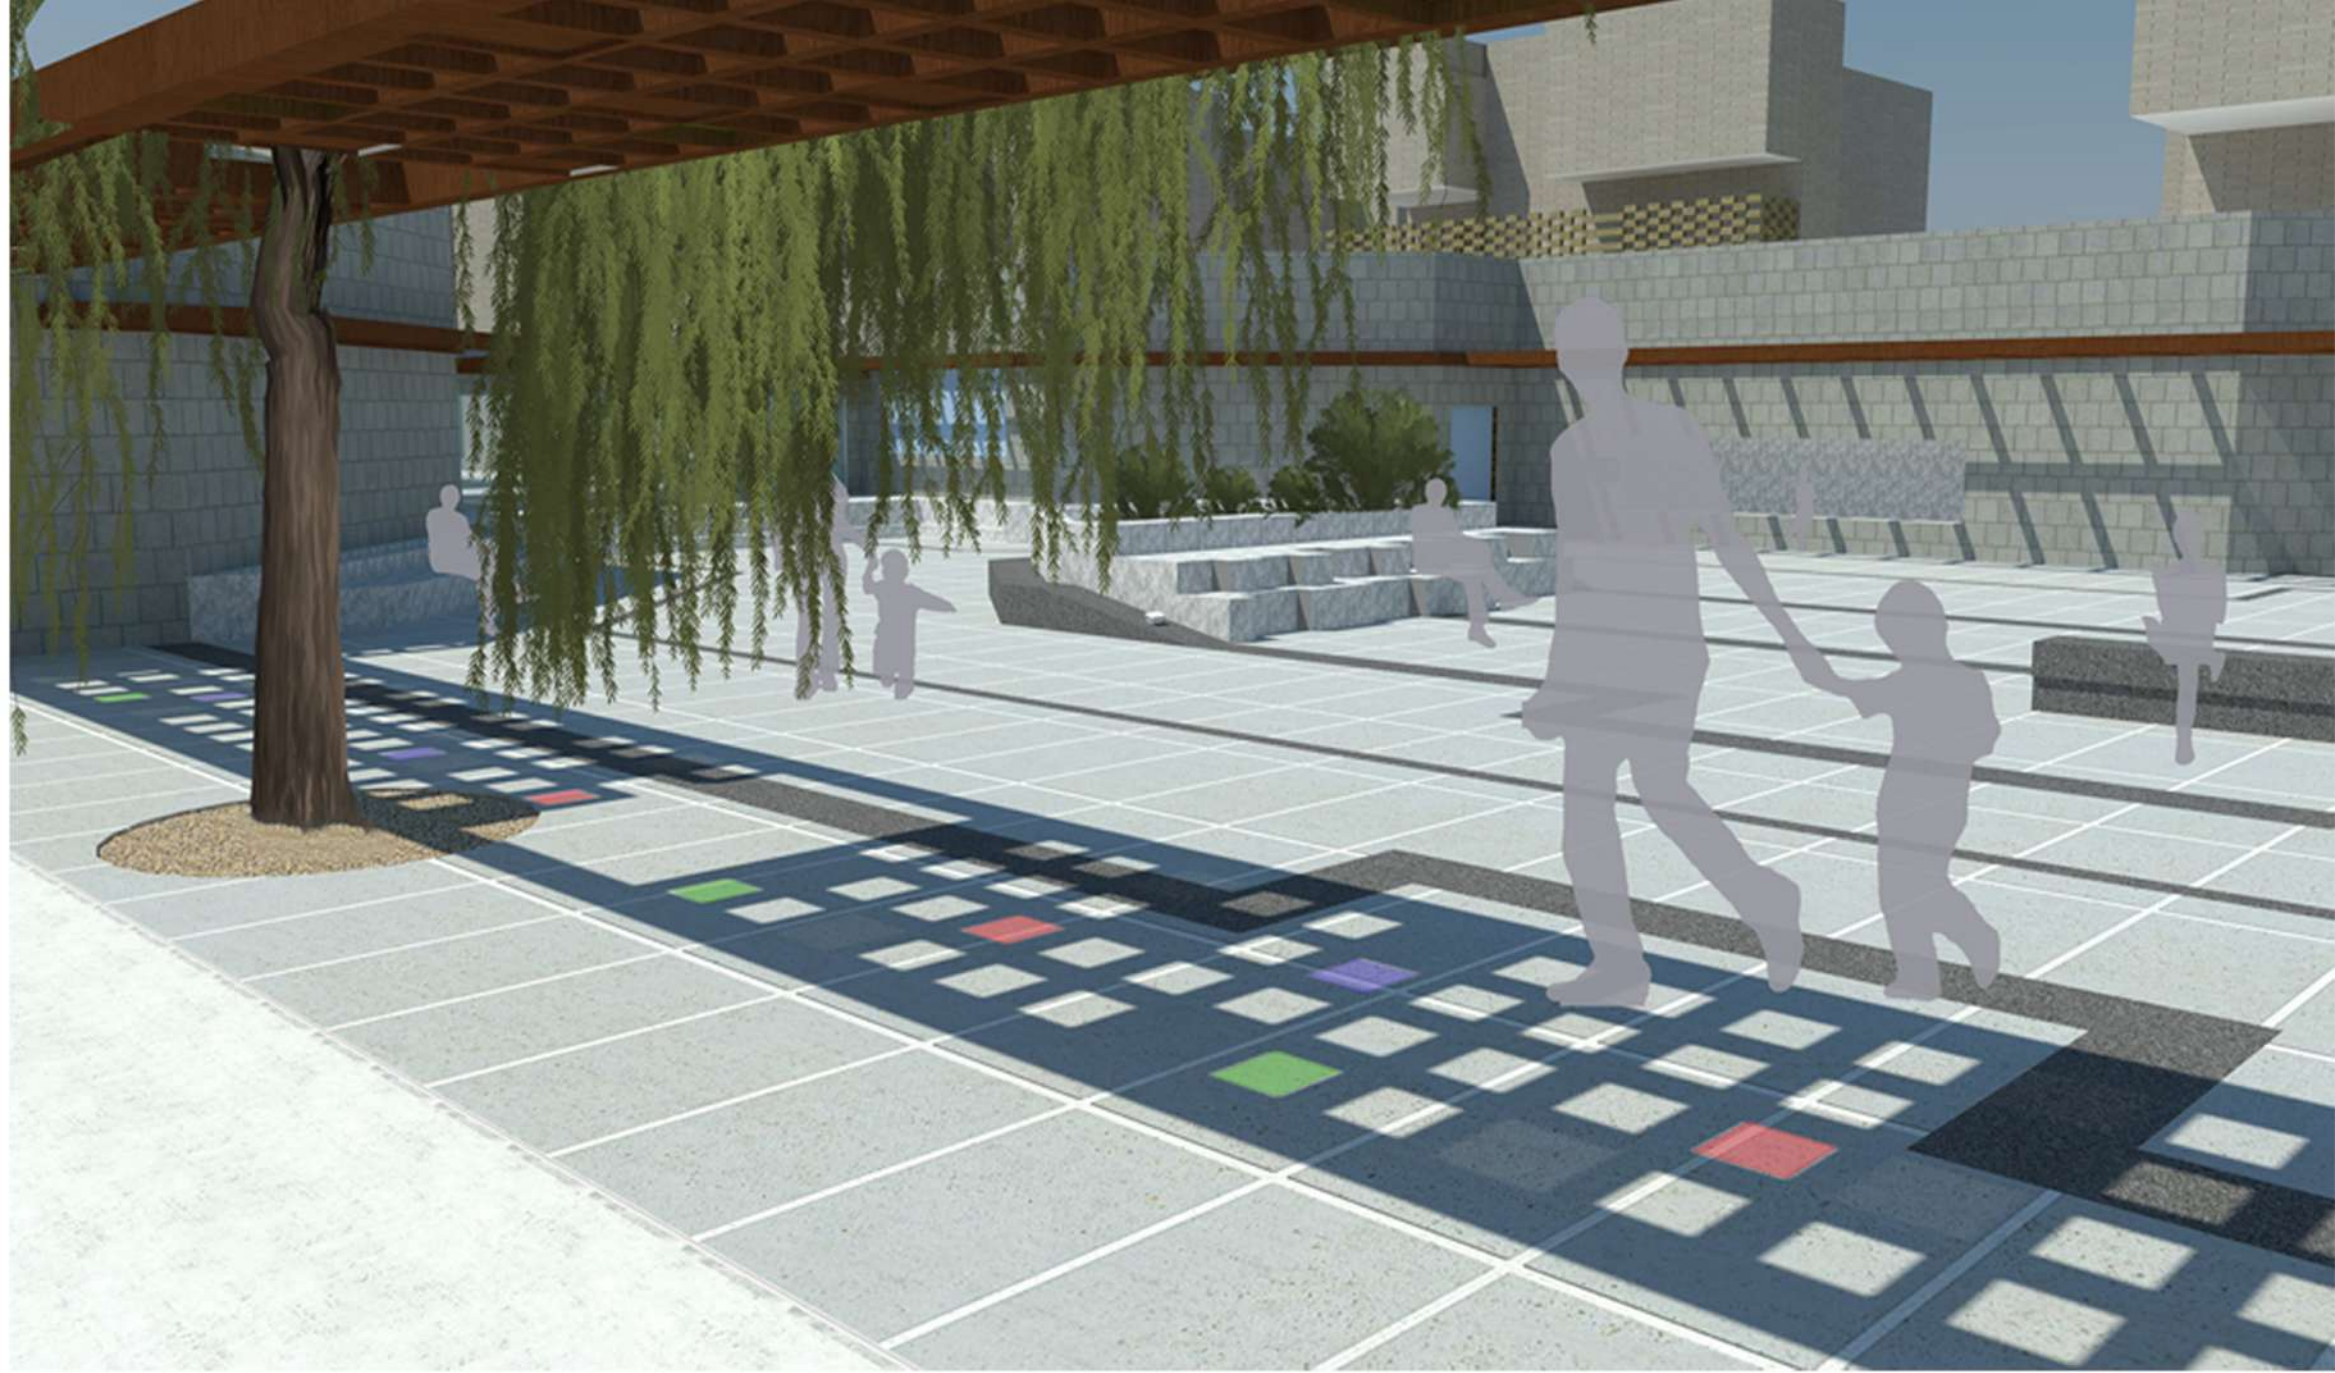

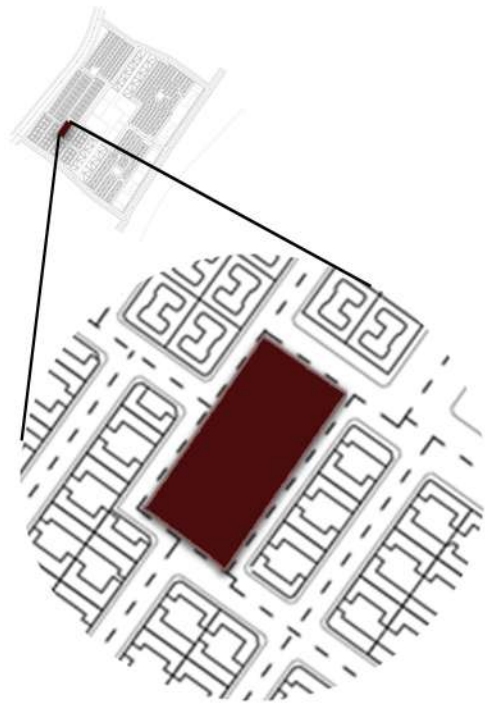

locating the buildings with regard to entrances

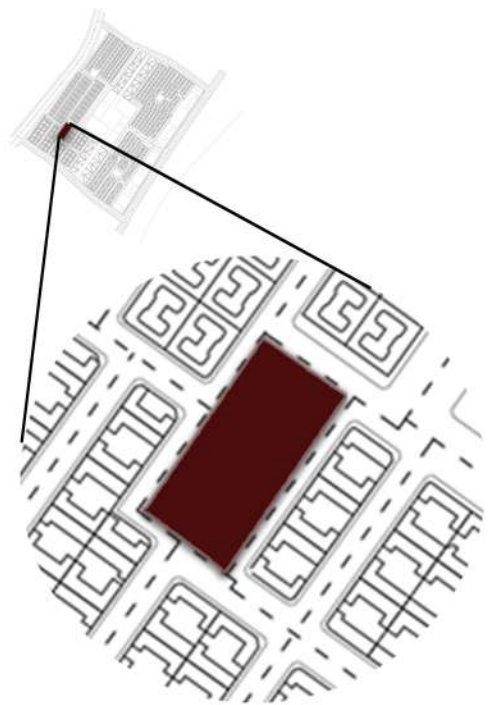

visual from one corner of center to another for a person standing outside

# Perspective
